DETAILED ACTION

1. The amendment filed on 10/12/05 has been fully considered and made of record.
2. The rejection of claims 5-8 which were rejected in Office Action mailed on 7/13/05 under 35 USC 103; these claims are rejected under 35 USC 103 herein for substantially the same reasons as provided in the previous Office Action which is incorporated herein and made a part hereof.

Response to Arguments

3. Applicants' arguments filed 10/12/05 have been fully considered but they are not persuasive for the following reasons:

In response to applicants' argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicants' disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

In the instant case, Nakagawa teaches a bulb Reed switch (Fig. 1, REED Switch) to be completely sealed from outside atmosphere (Col. 2, lines 65-67) in a cylinder (Fig. 1, 7) tightly fit with a cap (Fig. 1, 26), while protruding the lead lines (Fig. 1, 22 & 22') for electrical contacts, except for having the REED switch molded in a sealed cylinder as claimed, where the limitation of sealed-molding a device is obvious and well known in the art. Droscher et al teach the molding process to any electrical or electronic devices (Col. 4, lines 42 & 43) with the ranges claimed by applicants. It is obvious to one of ordinary skill in the art to apply the molding process taught by Droscher et al to tightly seal the REED switch in a water- or fluid-proof environment, as taught by Nakagawa, in order speed up the manufacturing of sealed REED switch, while cutting costs of different inventory parts such as cylinder and cap.

4. With the remainder of the claims 6-8 rejected under 35 USC 103, they stand rejected under 35 USC 103 as indicated in the previous Office Action and in response to Remarks in paragraph 3 above.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.

THIS ACTION IS MADE FINAL. Applicants are reminded of the extension of time

policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
